GT solutions and Medline strengthen their commitment to more sustainable healthcare transport

GT solutions and Medline are proud to announce the deployment of the first electric truck dedicated to the distribution of healthcare products on March 14 at Medline's site in Le Coudray-Montceaux. This partnership marks a major step forward in the decarbonization of sensitive goods transportation.

GT solutions and Medline: a partnership for energy transition

The transport company GT Solutions has been supporting Medline Europe for seven years in distributing medical and surgical devices across France to healthcare companies. As part of its long-standing ESG strategy, Medline sought to reduce the carbon footprint of its product distribution and partnered with GT solutions to introduce its first electric truck.

The Vehicle Will Be Commissioned on March 14 in Le Coudray-Montceaux

This is the first time Medline's fleet will include an electric truck—an investment aligned with its ambitious sustainability project.

« We aim to actively explore opportunities to integrate sustainability as a core pillar across all our operational activities in a meaningful way. This also means focusing on making a significant contribution to our customers by incorporating solutions that support their sustainability goals, particularly in reducing their Scope 3 carbon footprint »

Till Warburg,
Senior Director Operations
EMEA of Medline

It is also the first time GT Solutions is deploying an electric truck in the healthcare sector.

« Freight transport is evolving, and we must be drivers of change. This partnership with Medline demonstrates our commitment to a more sustainable future in the healthcare sector »

Matthieu Sarrat,
CEO of GT solutions

A key event to mark this milestone

To celebrate this achievement, an event will be held on March 14, 2025, at Medline's site in Coudray-Montceaux. This pivotal moment is an opportunity to raise employee awareness of key environmental challenges, with GT Solutions participating as an expert in energy transition.

This gathering will also be an occasion to celebrate the mutual commitment of both organizations to sustainability and innovation in the medical logistics sector.

About GT solutions

Founded in 1946, GT solutions is led by Matthieu Sarrat, great-grandson of founder Gaston Trochery. The French transport company has 1,900 employees and generates a turnover of €230 million. Its shareholding is 95% family-owned, with 5% of the capital held by employees. For more information, visit www.gt-solutions.fr.

About Medline

Founded in 1910, Medline is an international company specializing in medical and surgical devices. It employs over 38,000 people across nearly 100 countries. In Europe, Medline generates \$16 billion in revenue and has more than 1,100 employees. For more information, visit www.medline.eu
